

SureStep[®] Mats for Automatic Door Applications

The power of control. Automated.

Added Traction for Outdoor Environments

In environments where rain, snow, sleet and ice make entrances hazardous, Larco SureStep mats, with their aggressive non-skid surface can provide added protection over Larco standard ribbed mats.

Tested under the toughest environmental conditions, the Larco non-skid surface, combined with our totally submersible design, provides high reliability while reducing the risk of slipping on surfaces covered with rain and snow. Our non-skid mat is designed for slippery applications that require additional slip protection beyond that provided by our standard ribbed mat.

The mats are treated with a high-traction, long-wearing granular surface material that is bonded to the mat's vinyl surface with an adhesive that is designed to withstand oils, water and other fluids. The mats are constructed to withstand heavy pedestrian and vehicular traffic, including punishment from shopping carts, drywall wagons and other heavy-lift carts.

Utilizing proven technology and current advancements in materials, Larco switch mats have evolved to withstand extreme conditions for total safety and reliability without adjustments or maintenance.

Features and Benefits

• Custom Capabilities

A wide range of standard sizes and custom mat capabilities accommodates a broad variety of door styles and sizes.

• Designed for Safety

Larco safety mats are designed to meet or exceed ANSI standards for automatic doors.

• Easy to Order

ANSI-compliant door packages make ordering exactly what you need for your door style and size easy--everything you need under one part number, including mats, trim and guide rails.

Contact us for additional information and/or to order.
