Push Plate Switches

Durable Mounting Solutions For Tough Environments

Larco's push plate switches include a unique adapter plate (at no additional charge) that is intended for use with Larco's universal and round mounting boxes, as well as standard size 2" x 4" and 4" x 4" electrical boxes.

The slim-profile adapter plate cradles the wall switch, preventing access to the rear of the switch and protecting the switch's internal components from weather conditions, which makes Larco's already durable and dependable switches even more vandal and weather resistant than before.

Switch Options

Material
The standard finish is brushed 304 stainless steel cover plates that come with smudge-hiding brushed finish.

Weatherproofing
Although the standard Larco push plate switch is suitable for outdoor use, wall switches treated with a weather-resistant material are available for extremely wet applications. Add $22 to the base price of the switch for this option and add "W-" to the front of your part number.

Standard Engravings
Push plates switches are available with or without the standard engravings shown. Custom engravings, such as right and left arrows, special messages, symbols, and foreign languages can be made to order.

Ordering Information
Switches can be configured in a number of ways. You may purchase the push plate switches only for mounting to a standard electrical box or purchase a push plate switch and Larco wall box package for use in "hardwired" or with a transmitter and receiver for radio-controlled installations. They can be surface mounted or recess mounted with the same box.

Contact us to discuss your applciation requirements or customization needs. We look forward to working with you!

Quality

An important part of ATEK's commitment is the dedication to quality. Every Larco product must pass a rigorous quality inspection program. ATEK is ISO 9001 certified, and utilizes manufacturing quality principles such as lean manufacturing. While good solid processes and procedures are important to make quality products, it is the people at ATEK who make it happen. ATEK has some of the most experienced and talented individuals who fulfill ATEK's commitment to quality each and every day.

Service

A quality product must be backed by exceptional service, and this is where ATEK shines. ATEK is committed to providing on-time-delivery of defect-free products. With well trained and experienced people who provide great service and technical support, the entire ATEK team stands ready to serve its customers.
