

# Anodized Trim

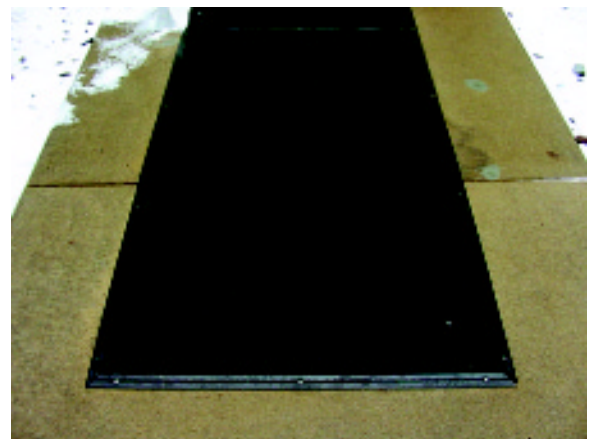

## *Anodized Trim Offers New Look for Larco Mats*

**Larco now offers anodized trim for automatic door control mats, improving the look of your entrance.**

*Designed for environments where rain, snow, sleet and ice can wreak havoc on external automatic door activation devices, Larco's new anodized trim offers you a durable, reliable and aesthetically pleasing way to install any automatic door control mat.*

*All Larco aluminum extrusions are made from 6063T5 mill finish aluminum, but Larco's new anodized trim has a 313 duronodic bronze finish that will attractively frame your door mat and match your building's facade.*

- **Durable construction designed to take punishment from pedestrians, moving equipment, carts and other high-traffic objects**
- **Available in stock lengths or in customized packages designed to accommodate specific mat installations**
- **Trim kits come complete with all necessary mounting hardware**
