

Totally Submersible!

Automatic Door Mats Operate Flawlessly in any Weather Condition

As a result of Larco's exclusive design and manufacturing process, the Larco presence-sensing automatic door mat is impervious to water and other fluids and can operate flawlessly under any weather condition, including snow, sleet, rain and ice.

The Larco mat is molded in solid vinyl, and the entire electrode and cord are hermetically sealed to withstand even the toughest climates. During the manufacturing process, the outer shell is molded to the heavy duty internal electrode to ensure a watertight assembly that will not allow fluids to seep into and short out the mat's closed-loop electrical circuit, even if the outer shell is punctured!

- **Totally Reliable**
Durable construction makes Larco mats impervious to rain, sleet, snow and ice.
- **Built to Last**
The Larco mat's heavy-duty electrode ensures reliability for more than 10,000,000 operations.
- **Designed for Safety**
Larco automatic door mats meet or exceed ANSI A156.10-1999.
- **Customizable**
Colors, shapes, sizes, and monograms are no problem. Larco mats can satisfy almost any automatic door need.
