

Custom Monograms & Logos

Customized Entrance Products to Enhance Your Automatic Doors

Larco presence-sensing automatic door mats are not only the safest, most reliable and most cost-effective door activation method, they're also the most customizable, offering a wide array of colors, surface styles and custom monograms and logos.

In addition to several standard logos, such as arrows and the international "do not enter" symbol, you can add company logos, lettering and numbers, or special greetings to any Larco mat for an additional charge.

Monograms and logos are molded of the same high-quality, high-durability vinyl as Larco's presence-sensing mats and are either molded directly into or permanently bonded to the mat for maximum wearability.

Larco mats come in 50 standard sizes, including replacement mats for all major automatic door manufacturers. You can also specify changes to the width and/or length or specify angles and radii in any standard mat to create an unlimited number of mat shapes and sizes.

Add a special touch to your entrance with a monogrammed presence-sensing automatic door mat. In addition to standard logos, such as the "Do Not Enter" symbol and arrows shown above, you can add your company logo to any mat to enhance your entrance or welcome customers.

Monograms can be molded directly into your mat, ensuring durability and wearability. Adding arrows and other standard logos add appeal and provide direction to customers entering and exiting your building.

Call Larco today for more information on custom monograms and logos for your entrance.
