Choosing Trim for Your Larco Automatic Door Mat System

Larco automatic door activation and safety mats are available in 8 different edge styles to accommodate any previous installation. To match trim to your particular mat model, simply find your mat style on the back page of this bulletin. Then use the table below to choose the trim that best fits your particular application.

Mat Trim and Threshold Details

Trim

Die #1100
4" Ramp Trim

This trim provides a gentle slope to the mat surface, making it excellent for use in applications with wheelchair traffic.

Die #1800
2-3/4" Ramp Trim

Designed to take heavy loads, this heavy-duty trim is best for environments with high pedestrian or shopping cart traffic.

Die #1714
2-1/2" Ramp Trim

This trim is best used to secure mats in places where more strength and longer ramps are required. This trim also enables easy mat removal and replacement.

Die #1814
2-1/2" Ramp Trim

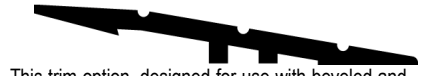

This trim is best used to secure mats in places where more strength and longer ramps are required.

Die #3311
2" Ramp Trim

The most popular trim option, this ramp is designed to eliminate trip hazards and works well in pedestrian traffic.

Die #1049
2" Ramp Trim

This trim option, designed for use with beveled and tapered edge mats, is designed to eliminate trip hazards in normal pedestrian traffic.

Die #552
1-1/2" Ramp Trim

This specialized trim is designed specifically for 3/8" thick mats.

Trim

Die #1057
3/4" Recessed Trim

This trim is used to secure mats in flush mount applications.

Die #1250
2-1/2" Beveled
Lead-up

Used in conjunction with Trim #1048 or #200 for threshold installations with 1/2" thick mats used for safety only.

Die #1048
3" Threshold /
Joining Strip

Used in threshold installations with 1/2" thick mats used for both activation and safety or in conjunction with Trim #1250 for safety only installations.

Die #1051
2" Threshold/
Joining Strip

Used to join two mats lengthwise in a multiple-mat installation.

Die #200
2" Threshold/
Joining Strip

Used in threshold installations with 1/2" thick mats used for both activation and safety or in conjunction with Trim #1250 for safety only installations.

Die #2705
1-3/8" Joining Strip

Used to join two mats lengthwise in a multiple-mat installation.

Die #1530 & #1535
2-3/4" Dovetail
Threshold

Used in threshold installations with 3/8" thick mats used for both activation and safety.

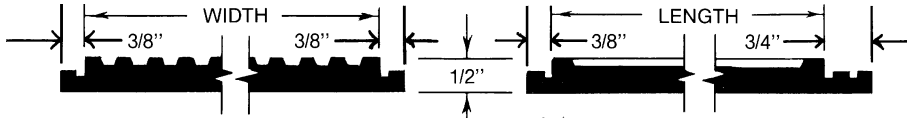

Die #1510 & #1515
1" Dovetail
Threshold

Used in threshold installations with 3/8" thick mats used for both activation and safety.
