

SureStep Mats

Added Protection for Unique Environments

In industrial environments where liquids, oil and grease make floors hazardous, Larco's SureStep mats with their aggressive non-skid surface can provide added protection over Larco's standard ribbed mats.

Tested under the toughest industrial conditions, Larco's non-skid surface combined with our totally submersible design provides high reliability while reducing the risk of slipping on surfaces covered with grease and oil. Larco's new non-skid mat is designed for unique applications that require additional slip protection beyond that provided by Larco's standard ribbed mat.

The mats are treated with a high-traction, long-wearing granular surface material that is bonded to the mat's vinyl surface with an adhesive that is designed to withstand oils, water, and other fluids. The mats are constructed to withstand heavy pedestrian and vehicular traffic.

- **Reliable**
Larco safety mats are not laminated and WILL NOT SEPARATE. Hermetically molded in solid vinyl, they are fluid, chemical, abrasion and impact resistant and have a high load-bearing capacity.
- **Built to Last**
Heavy-duty electrode assembly provides impact resilience to dropped parts and withstands heavy forklift traffic.
- **Custom Capabilities**
A wide range of standard sizes and custom mat capabilities accommodates a broad variety of safeguarded area configurations and reduces inventory cost.
- **Designed for Safety**
Larco safety mats are designed to meet or exceed ANSI B11.19-1990 machine tool safety standards, OSHA 1910.212 general machine guarding standards and RIA R15.05-1999 robotic safety requirements.
