ATEK Products Launches New Larco Web site

Web site simplifies selection of Larco safety, security and activation solutions

BRAINERD, MINN. (August 26, 2008) – [ATEK Products](http://www.atekproducts.com), the manufacturer of Larco brand sensing mats and wall switches, controls and safety barrier solutions, and other proprietary products has launched its new Web site. Redesigned to support the selection and specification of safety products for its users, the new site — www.larco.com — provides a comprehensive view of the full Larco product line including application scenarios and technical schematics.

“The safety and security of a company’s clients and employees is the highest priority for organizations across industries and regions — from grocery stores to automobile manufacturing plants,” said Varuni Novick, president of ATEK Products. “Recognizing the importance of proper selection of safety, security and activation products based on application needs, we redesigned the Larco Web site to be an easy-to-access and user-friendly repository for product information. By researching products online, our customers can be confident that they have selected the right product for the application.”

With the click of a mouse, end-users, engineers, contractors and architects have access to installation instructions, technical information and architectural specifications for all Larco products currently available, including the recently introduced U-WAV Touchless Wall Switch designed for hands free door activation.

ATEK Products’ parent company, ATEK Companies, has also redesigned its corporate site (www.atekcompanies.com) as well new Web sites for sister companies, [ATEK Medical](http://www.atekmedical.com) (www.atekmedical.com) and [ATEK Plastics](http://www.atekplastics.com) (www.atekplastics.com). Each site provides in-depth detail about the history of the division, services and capabilities, industries served, and current happenings. New sites for [ATEK Manufacturing](http://www.atekmanufacturing.com) (www.atekmanufacturing.com), ATEK Products (www.atekproducts.com), and [Progress Casting](http://www.progresscasting.com) (www.progresscasting.com) are in progress and will be launched in the near future.

About Larco

Since its founding over 50 years ago, Larco has become a household name in the automatic door industry. Pioneers in the automatic door mat, Larco today is part of the ATEK Companies, a management company with four other manufacturing companies based in Minneapolis, Minn. Larco Manufacturing provides products to the automatic door industry, including door mats and handicap wall switches. For more information on Larco, please visit <http://www.larco.com>
