

# Anodized Trim

Designed for environments where rain, snow, sleet and ice can wreak havoc on external automatic door activation devices, Larco's anodized trim offers a durable, reliable and aesthetically pleasing way to install any automatic door control mat.

All aluminum extrusions are 6063 T5 mill finish. Larco's anodized trim is also available in a 313 duranodic bronze finish that will attractively frame the door mat and match the building's facade.

Larco's anodized trims provide an architectural accent to any automatic door application. Durable and aesthetically pleasing, Larco's anodized trim kits can be used in any application a standard trim might, but where a unique appearance is preferred.

## Features and Benefits

- Durable construction designed to take punishment from pedestrians, moving equipment, carts and other high-traffic objects
- Available in stock lengths or in customized packages designed to accommodate specific mat installations
- Trim kits come complete with all necessary mounting hardware

## Applications

- Architectural Accents
- Automatic Doors
- Safety Mats
