

Guardian II

Administration Kit

The power of control. Automated.

The Guardian II™ Administration Kit ("admin kit") includes everything you need to start using the Guardian II controllers/access control system. This admin kit includes the Guardian II software application, a G2 Programmer (with USB cable), a Guardian II admin key, a Guardian II export key, and (5) Guardian II user keys. Additional keys can be purchased separately, if desired.

The easy-to-use Guardian II software application allows administrators to manage access rights for all users and monitor their usage. User access can be granted or denied based on individual, access point, day, time, group, and much more. All controllers and users can be managed from a single software application/admin kit, and additional controllers and users can be added or deleted at any time.

Controller set-up information is easily transferred from the software application to the controller by use of the Guardian II admin key. Similarly, all audit trail information is easily transferred from the controller back to the software application by use of the Guardian II export key. All keys are programmed and read via the G2 Programmer (included in the admin kit), which is connected to the administrator's PC via a standard USB cable (no network required). The Guardian II software provides complete reporting capabilities of audit trail details in the included reports plus the ability to export the data to an external file, if desired.

Kit Includes

- Guardian II software
- G2 Programmer
- Admin & export keys
- Five user keys

Guardian II System Overview

Guardian II Controller
Stores all set-up and audit trail data in its memory (no network required).

Admin Key
Admin keys transfer set-up data from the Guardian II software to the Guardian II controller.

Export Key
Export keys transfer audit trail data from the Guardian II controller back to the Guardian II software.

User Key
Each user carries their own electronic key to gain access to areas where they are approved.
